PRODUCT/PROCESS CHANGE NOTIFICATION (PCN)

Number: 1612-1 Date: 12/9/2016 From: Dave Jahr

Product Family: All POTSwap Products

Effective Date:1/1/2017

Reason for Change:

A new LTE (4G) POTSwap product and connector/component end-of-life issues require Janus to reconfigure current POTSwap products to incorporate newer Janus Plug-In Cellular Modems and use discrete transistors in their design. The revised POTSwap product will be available for delivery starting in January 2017.

Change Category: New POTSwap Product / Product change.

Executive Summary: A change will be implemented to current POTSwaps to circumvent the Murata GSC connector as well as silicon labs transistor IC end-of-life issues. A new U.FL cable and discrete transistors will be used on revised current models as well as new LTE models.

Current Products Affected:

New Part Numbers as of January 2017:

- EVDO910PS V3.00 TAGFNG>>>>>>>>>>EVDO910PS V3.00 TAUVNG
- 2. HSPA910PS V1.00 TAGFNG>>>>>>>>>HSPA910PS V1.00 TAUVNG

New Products (release tentatively set for Q1 2017):

- 1. LTE910PS V1.00 TAUVNG (AT&T)
- 2. LTE910PS V3.00 TAUVNG (Verizon)

Details and Effect on Product Performance: No impact to product performance.

Process changeover completion: Q1 2017.
